Advanced Apprenticeship

The Advanced Apprenticeship in Town Planning Technical support is intended to support learners employed in a technical role within town planning providing technical, administrative and clerical support to planning services, liaising with customers and providing advice and guidance.

It gives the opportunity to develop knowledge and skills in town planning technical support and learn about policy, procedures, building regulations and controls affecting the town planning role and about professional development and employment for those new to the sector.

There are a number of available pathways within the work-based modules allowing you to select from a range of mandatory and optional modules which can be tailored to suit your work role.

Apprenticeship requirements

To complete your apprenticeship, you will also need to achieve English and maths, if you haven’t already achieved a C (new level 4) or above at GCSE. You will also complete wider skills development relating to professional behaviours which will support you in your chosen career.

Well equipped to deliver training in Town Planning:

- Expert tutors who have worked in the industry
- Modern classrooms equipped with the latest technology
- IT Suite with AutoCAD, Revit, Microsoft Project and other relevant industry software
- Industry standard surveying equipment
- A range of online resources and a well-resourced library to support independent research.
Getting started on an Apprenticeship

At the outset of the apprenticeship, we work with you and your employer to design an apprenticeship that will best suit your role and level of authority. These apprenticeships usually take around two years to complete but again, we'll discuss this with you at the start.

Applying for an Apprenticeship

Apprentices need to be employed in a relevant role for at least 30 hours a week and be at least 16 years old. You may already have an employer who wants you to complete an apprenticeship with them but if you don't, get in touch and we'll see if we can help. Acceptance will be subject to initial assessment and interview to ensure that the apprenticeship is suitable for your vocational aptitude and transferable skills levels.

I started work at 16 and came straight onto the Advanced Apprenticeship. I feel that combining work with study will give me lots of options for the future. The course will support my future career progression and I am considering progressing to the Higher Apprenticeship after I finish my Advanced Apprenticeship.

Cameron Campbell, Bonus Build

How Apprenticeships benefit businesses:

- Apprentices bring new skills and enthusiasm into your team
- Your apprentice will be trained by industry experts
- Apprenticeships can be tailored to meet your industry needs
- We can help you recruit apprentices
- 100% Government contribution for training a 16 – 18 year old in a small business (less than 50 employees)
- Incentive grant of £1000 to support the additional costs of employing a young apprentice

We began working with Moulton College over two years ago and the service provided has been absolutely magnificent. Moulton's educational programme perfectly complements the practical skills training provided on-site and offers the best opportunity to succeed. We look forward to maintaining our relationship for years to come.
