

# Advanced Apprenticeships in Construction

Apprenticeships allow you to combine work with college-based training and result in the achievement of a range of qualifications. Abingdon and Witney College apprenticeships delivered on the Moulton campus offer an Advanced Apprenticeship in either Built Environment and Design or Construction Contracting Operations

## Advanced Apprenticeship

Our Advanced Apprenticeship in Construction offers two pathways:

- The Construction Contracting Operations pathway is ideal if you are working in a technical support role carrying out estimating, buying, planning or supervising construction operations.
- The Built Environment and Design pathway is suitable if you are working as a Design Technician producing drawings and presentations using computer aided design software, electronic visualisations and models.

On both you will study an NVQ Diploma in either Construction Contracting Operations or Built Environment and Design as well as a Diploma in Construction and Built Environment. The Diploma qualification will develop technical skills and understanding of the construction industry with topics

studied including building architecture and design, management of the construction process, efficient use of materials and resources, the principles of surveying, quantity surveying and computer aided design. The NVQ will assess the knowledge and competence required to perform your job role with core units covering health and safety, working relationships and a range of optional units that will be tailored to best match your work role.

## Well equipped to deliver training in Construction Management:

- Industry-experienced lecturers
- Cutting-edge technology
- Software including AutoCAD, Revit and Microsoft Project
- Industry standard surveying equipment
- Online resources and extensive library facilities

APPRENTICESHIPS

## Apprenticeship requirements

To complete your apprenticeship, you will also need to achieve English and maths, if you haven't already achieved a C (new level 4) or above at GCSE. You will also complete wider skills development relating to professional behaviours which will support you in your chosen career.

## Getting started on an Apprenticeship

At the outset of the apprenticeship, we work with you and your employer to design an apprenticeship and training package that will best suit your role. These apprenticeships usually take 24 months to complete but again, we'll discuss this with you at the start.

*I started work at 16 and came straight onto the Advanced Apprenticeship. I feel that combining work with study will give me lots of options for the future. The course will support my future career progression as a Site Manager and I am considering progressing to the Higher Apprenticeship after I finish my Advanced Apprenticeship.*

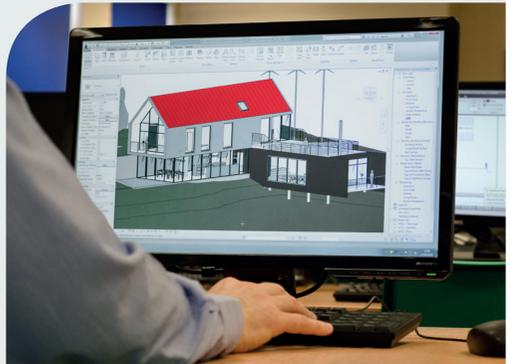

Cameron Campbell, Bonus Build

*We began working with Moulton College over two years ago and the service provided has been absolutely magnificent. Moulton's educational programme perfectly complements the practical skills training provided on-site and offers the best opportunity to succeed. We look forward to maintaining our relationship for years to come.*

Joe Smith, Director at Bonus Build Ltd

## Applying for an Apprenticeship

Apprentices need to be employed in a relevant role for at least 30 hours a week and be at least 16 years old. You may already have an employer who wants you to complete an apprenticeship with them but if you don't, get in touch and we'll see if we can help. Acceptance will be subject to initial assessment and interview to ensure that the apprenticeship is suitable for your vocational aptitude and transferable skills levels.

## How Apprenticeships benefit businesses:

- Apprentices bring new skills and enthusiasm into your team
- Your apprentice will be trained by industry experts
- Apprenticeships can be tailored to meet your industry needs
- We can help you recruit apprentices
- 100% Government contribution for training a 16 – 18 year old in a small business (less than 50 employees)
- Incentive grant of £1000 to support the additional costs of employing a young apprentice
