# Craft Carpentry & Joinery

Duration: 15 months

Delivery Model: Day Release

## Overview

Advanced Site Carpenters work on building sites in the construction of domestic and commercial properties, preparing and installing complex and bespoke building components.

They prepare, construct and erect irregular and complex roof structures.

## Potential Progression Routes

- Level 4: Construction Site Supervisor
- Level 5: Heritage Construction Specialist
- Level 6: Construction Site Management

## Qualification Awarded

- Apprenticeship certificate
- Level 2 Maths and English (if applicable)

## End Point Assessment Content

Multiple choice test, practical assessment with questions, interview underpinned by a portfolio of evidence.

## Skills an apprentice will learn

- To be compliant with health, safety and environment requirements for self and others.
- Plan and organise the work site including setting out the work site, materials, tools and equipment appropriate to the project for self and others.
- Take a lead when working in a team, especially when complex or non-standard work is involved.
- Install accessible service encasements, bespoke wall and floor units, fitments, panelling and stair components.
- Interpret technical specifications including digital information, identify requirements, develop the work programme and schedule, plan own work and that of the team.

## Did you know?

This apprenticeship standard is eligible for CITB apprenticeship grants and we can support employers claiming CITB grants.
