Part time / Full time

LOCATION
Moulton

LEVEL
Level 5

START DATE
Sept 2025 / Sept 2026

DURATION
3 years / 2 years

AWARDING BODY
University of
Northampton

This course is suitable for anyone wishing to work with animals and will give students the knowledge and expertise to enter a wide range of professions in this area.

This is a two year Level 5 programme with the opportunity to enter the BSc (Top Up) upon achievement.

Our on-site facilities include a working farm, Animal Welfare Centre, Equine Yard and Veterinary Practice, where you can gain hands-on commercial experience alongside your studies.

We also have links with a wide range of animal organisations, such as Woburn Safari Park, Colchester Zoo, The Raptor Foundation, Yorkshire Wildlife Park, Dodson and Horrell Feed Specialists, RSPCA, Woodgreen Animal Shelter and Twycross Zoo.

What will I learn on the course?

The first year provides the underpinning knowledge of how animal bodies work and how different species are managed as well as allowing you to sample a variety of areas to specialise in later.

You will be able to gain hands-on experience of working with a wide range of species alongside studying the more scientific aspects of keeping animals.

In year two, you will further explore animal body systems and the law and ethics behind the animal industry whilst specialising in one of the following: Animal Science, Veterinary Health, Animal Behaviour and Welfare or Conservation.

Industrial experience and research forms a key part of this course whereby you must also complete an industrial placement and project of your choice within the animal sector.

What will this course cost me?

For information about course fees please refer to our [Fees and Financial Support](#) pages.

How will I be assessed?

The course is assessed through a range of assessments including written assignments, poster presentations, seminar presentations, portfolios, exams and project work. The course is mostly assessed through individual assessments, but elements of group work may be incorporated to bring in a real-world learning experience.

The Foundation degree is unique in that it includes two modules with strong industry links; a work placement at an agreed placement and an industry linked project.

Our variety of assessment methods, providing students with an increased chance of success, have been commended by external examiners.

Where can it lead to?

Upon successful completion of this course you could progress on to our BSc (Hons) top-up degree to complete your studies. Previous students have progressed from this course to work in various fields in the animal industry.

What are the entry requirements for this course?

Please see the typical offer list below. A wide range of qualifications are accepted. Applicants may also be offered a place on the basis of their experience and we would welcome applications from mature students or people currently working in industry who are seeking Continuing Professional Development (CPD) or part time study opportunities

Qualification	Grade Profile UCAS Tariff Points
